

eCTAS Release Notes: Version 2.30.1.0

Release Date: June 11, 2024

Integrations: **B** - Basic **C** - Complex **WS** - Web Service **CRT** - Certification

| Change Type | Details | B | C | WS | CRT |
|--------------------------|---|---|---|----|-----|
| Performance Improvements | System Upgrades <ul style="list-style-type: none">A system component upgrade is being applied to help mitigate recent performance degradations in HL7 message processing. | | ✓ | | |
| | System Reliability <ul style="list-style-type: none">A temporary fix has been applied to address recent failures in saving triage data due to duplicated vital complementary field values. Duplicate values will temporarily be permitted until a full fix can be applied in release 2.31. Duplicate values, if they occur, will be seen in the Site Level Extract data. The triage print report and HL7 triage message will contain the correct values. | ✓ | ✓ | | |
