eCTAS Release Notes: Version 2.23.1.0

Release Date: June 30, 2022

Integrations: **B** - Basic   **C** - Complex   **WS** - Web Service   **CRT** - Certification

Change Type	Details	B	C	WS	CRT
Bug Fixes	**Triage message correction** • Application Complex hospitals that have upgraded to the latest version of the HL7 specification ([Release 2.19](#)) will now receive infection screening responses as full text values rather than letter-based codes in all message types. An issue that prevented the full text value from being transmitted in ORU (triage) messages has been resolved. • This fix impacts the Provincial Screening Questions (PSQ) and Additional Screening Questions (ASQ) OBX segments.		✅
