Release Notes: Version 2.7.0.0

Release Date: November 13, 2018

N **Note:** Nurses may need to clear their browser cache if changes are not immediately visible in the eCTAS application.

> **Integrations:** **B** - Basic   **C** - Complex   **WS** - Web Service   **CRT** - Certification

Change Type	Details	B	C	WS	CRT
Hospital Requested Enhancements	**Pain Score Zero** • A zero score is now available in the Pain field drop down list on the Triage Assessment screen (i.e. scale was previously 1-10; now 0-10). • This change is reflected in reassessments, HL7 messaging and printouts. • Chronicity and location are not required when zero is selected.	✓	✓	✓	✓
User Interface (UI) Changes	**Help Icon** • A help icon (?) is now located in the top right corner of the eCTAS Clinical Application and links to eCTAS Clinical End User Online Help. In the eCTAS Administration Console, an identical icon links to eCTAS System Administration Online Help.	✓	✓		
	Previous ED Visits • eCTAS Application users will now be able to see Medical History, Medications, Treatment/Intervention, and Allergies information on flagged Previous ED Visit records when available.	✓	✓		
	Unknown Patient Counter • A count/number is no longer added to the 'Unknown Patient' identifier when 'Patient cannot be identified' is checked on the Patient Presentation screen (i.e. previously 'Unknown Patient 1', 'Unknown Patient 2'; now 'Unknown Patient' with no count/number). • Nurses can modify or add free text to the 'Unknown Patient' identifier for clarification as needed (e.g. 'Unknown Patient Head Injury').	✓	✓		
Bug Fixes	**Patient Cohort Identification** • The patient's estimated age and cohort are now updated when the date of birth is changed.	✓	✓	✓	✓
Performance Improvements	• General performance upgrades have been made to ensure system stability as onboarding of facilities continues.	✓	✓	✓	✓
